

Safety Policy

Chemco International Ltd is a company committed to achieving and maintaining the highest standards of Health & Safety for its employees and to conduct its business activities with due concern for the Health & Safety of the general public.

The Directors of the company are intent upon creating within the organisation a "Safety-conscious environment" by actively involving all members of the company to promote and take responsibility for Health & Safety as an integral part of their duties.

To achieve its objectives, the Directors will establish a Health & Safety management system encompassing procedures, risk assessments and records relating to the company's operations and process to be adopted and managed by all members of the company. The Directors will also provide all necessary and supplementary training on matters related to Health & Safety for its employees and make available the necessary protective clothing and equipment to safeguard against such hazards as cannot be completely eliminated.

By actively providing support and encouragement to all members of the organisation, the company believes that with the co-operation of everyone to investigate accidents and dangerous occurrences to prevent their re-occurrence, it can achieve its goal of a safe working environment and the total eliminations of accidents.
