

Solvent & styrene-free tank & pipe lining products

Low odour & ECO friendly

Ideal for high humidity and damp environments

Chemco have developed a range of chemical resistant pipe and tank lining products that are styrene and solvent-free. They are based on epoxy or epoxy novolac leading edge technology and can be filled with glassflake and other specialist fillers depending on the application. There are significant cost savings possible at application over traditional vinyl ester and polyester systems because;

- They are non-flammable, styrene-free and do not require special ventilation equipment during application.
- They are moisture tolerant and work in high humidity ambient conditions and can be applied onto damp substrates. They are ideal for hydro-blast preparation.
- They are also less prone to failure caused by poor application conditions and surface preparation.
- They do not require primers.
- Ambient application conditions are far less stringent saving money with reduced "painting downtime".

RA 564 being spray applied

RA 500

Ideal for application in high humidity environments.
Excellent chemical resistance.
Will adhere to damp and sweating substrates.

RD 500

Used in the nuclear industry as a pipe and tank-lining product i.e. at Dounreay Nuclear Power Station.

RJ 500

Extremely smooth finish that is very easy to clean and minimises bacterial growth.
The finish helps reduce batch-to-batch contamination.
Ideal for wine and beer applications.
Approved by Bass for beer tank linings.

RW 500

Ideal for flue gas applications up to 220°C
Exceptional heat and chemical corrosion resistance.

RF 500

Ideal for highly acidic conditions such as 98% sulphuric acid.

RI 500

Ideal for cost sensitive applications.
Good application properties in high humidity environments or onto damp or sweating substrates.
Good chemical resistance.

Chemco manufactures an extensive range of products which are designed to meet every corrosion and containment challenge. We offer unlimited technical support including site survey, estimation, inspection and application assistance. An extensive list of our products and industry uses are listed below:

Products

Glassflake coatings
Coatings in contact with food & beverage
Damp or green concrete primers and coatings
Floor coatings
Rust converters and primers
Under-water coatings
Anti-static and conductive coatings
Elastomeric coatings
Fire retardant & intumescent coatings
Ceramic coatings

Industry

Petro-chemical
Food and beverage (including wine & beer tanks)
Water & sewage (including drinking water)
Nuclear and power generation
Maintenance and new construction
Marine industry (including ballast tank)
Ministry of defence
Car parks, industrial warehouses
Fire and heat protection
Heat insulation
