Ideal for solvent and odour sensitive areas

Chemco have developed a range of solvent-free floor and waterbased coatings that are hard wearing, chemically resistant and can be made to any colour. Unlike traditional flooring systems, they do not contain solvents, they are non-flammable and have very little smell and they do not require any special ventilation during application.

Diamond-top™ – Anti-slip Coating - This is a patented anti-slip compound that is scratch resistant and can be any colour and easy applied. Its novel surface makes it very easy to clean and maintain. It can be coloured and patterned to match any existing or planned décor. It is ideally suited for entrances, restaurants, corridors, toilets and food process areas.

Easi-flor™ - Floor Paint - This is a water-based floor paint that lasts twice as long as traditional solvent based paints. It is easily applied, has no smell during application and can be walked on in 2 hours. This product has been used in retail outlets, food factories, power stations and hospitals because of the low smell and high wear characteristics.

Easi-flor™ Anti-slip - Floor Paint - This is an anti-slip version of Easi-flor™ that is durable and wear resistant. It works well in both wet and dry conditions.

Chem-deck™ - Floor Coating - These are a range of very hard wearing and chemically resistance epoxy flooring products. They can be formulated to be conductive, anti-slip, anti-static and anti-skid. These are ideally used in industrial applications where there is extremely high traffic or corrosive conditions.

Nano-lite™ - Flooring Compound - This is a very lightweight flooring screed that is ideal for levelling applications where weight saving is required. Its unique compound offers a high degree of heat insulation and is ideal for cold store areas.

Damp-crete™ Primer – A fast solution for Priming Green Concrete. This has been developed as a primer for green concrete. It can prime green concrete as soon as it has set. There is need to wait for 28 days for the concrete to fully cure. It can then be painted with Easi-flor™ in just 24 hours.

Chemco's flooring products do not smell during application and no special ventilation is required.

Chem-deck™ in a bottling plant

Chemco manufactures an extensive range of products which are designed to meet every corrosion and containment challenge. We offer unlimited technical support including site survey, estimation, inspection and application assistance. An extensive list of our products and industry uses are listed below:

Products

Glassflake coatings
Coatings in contact with food & beverage
Damp or green concrete primers and coatings
Floor coatings
Rust converters and primers
Under-water coatings
Anti-static and conductive coatings
Elastomeric coatings
Fire retardant & intumescent coatings
Ceramic coatings

Industry

Petro-chemical
Food and beverage (including wine & beer tanks)
Water & sewage (including drinking water)
Nuclear and power generation
Maintenance and new construction
Marine industry (including ballast tank)
Ministry of defence
Car parks, industrial warehouses
Fire and heat protection
Heat insulation
