## *Ideal for solvent and odour sensitive areas*

**Easi-flor™** - Water-based floor coatings that are hard wearing, chemically resistant and can be made to any colour. Unlike traditional flooring systems, they do not contain solvents, are non-flammable, have very little smell and do not require any special ventilation during application.

### **Damp-crete™** - quick prime - damp concrete primer

*This unique primer can be used on saturated or green concrete as a sealer or primer. It can be applied as soon as green concrete has set. It is fully cured within 24 hours and be coated with our Easi-flor™ products well before the normal 28 day period allowed for normal priming systems onto new or green concrete.*

### **Chem-concrete™** - concrete repair system

This is a range of concrete and crack repair systems that are solvent-free, easy to use and very durable.

### **Chem-deck™** - floor coating

These are a range of very hard wearing and chemical resistant epoxy flooring products. They can be formulated to be anti-slip, anti-static and anti-skid. They are ideally used in industrial applications where there is extremely high traffic or corrosive conditions.

*Chemco's flooring products do not smell during application and no special ventilation is required.*

Chem-deck™ in a  
bottling plant

### **Nano-lite™** - flooring compound

This is a very lightweight flooring screed that is ideal for levelling applications where weight saving is required. Its unique formulation offers a high degree of heat insulation and is ideal for cold store areas.

### **Chem-deck™** - conductive flooring

All of the flooring systems can be made to have anti-static and conductive properties or formulated to meet your requirements

Chemco manufactures an extensive range of products which are designed to meet every corrosion and containment challenge. We offer unlimited technical support including site survey, estimation, inspection and application assistance. An extensive list of our products and industry uses are listed below:

## Products

- Glassflake coatings
- Coatings in contact with food & beverage
- Damp or green concrete primers and coatings
- Floor coatings
- Rust converters and primers
- Under-water coatings
- Anti-static and conductive coatings
- Elastomeric coatings
- Fire retardant & intumescent coatings
- Ceramic coatings

## Industry

- Petro-chemical
- Food and beverage (including wine & beer tanks)
- Water & sewage (including drinking water)
- Nuclear and power generation
- Maintenance and new construction
- Marine industry (including ballast tank)
- Ministry of defence
- Car parks, industrial warehouses
- Fire and heat protection
- Heat insulation
