Chemco have developed a range of coatings that are ideal for areas where traditional solvent borne systems cannot be used. They have the following advantages over traditional solvent borne systems: -

- Little or no odour – no toxic or flammable solvent smells during application.
- **No costly** ventilation or safety precautions required.
- Can last twice as long as solvent borne equivalents and will **save money** over the long-term.
- Back into service times as little as 2 hours and will save money in **reduced downtime**.
- **Superb** adhesion and durability.
- Will save money in **reduced application costs**, as **one coat** is often **sufficient**.
- Require **minimal surface** preparation.

Easi-flor™ - an excellent hardwearing floor coating. You can apply one coat that lasts **twice as long** as solvent borne systems. **Fork trucks** can drive on it in **8 hours**. Peterhead Power Station used it to coat 6000 sq. ft. Anti-slip versions available.

Easi-cote™ - an ideal structural coating where longevity and durability is required. This was used at Prestwick Airport as an external coating for fuel storage tanks – touch dry in 2 hours.

Easi-gloss™ - unlike solvent borne gloss, this is **touch-dry in 2 hours**. Again they are far more durable and scratch resistant than standard solvent borne gloss systems. They do **not yellow** on aging. **Superb chemical** resistance compared to traditional systems.

Wet-cote™ - can prime and finish **wet** and **sweating substrates** such as condensing process pipes.

Rust-fix Aqua™ - these are water borne rust converters and converter primers that are used with **poorly prepared** and **rusty** surfaces. They are solvent-free and have little or no smell.

Easi-prime™ - can prime and prevent corrosion from occurring. It is easily applied on top of Rust-fix™ Aqua™ or can be used on its own as a corrosion inhibiting primer.

Easi-repair™ - a range of **solvent-free metal repair compounds**. They are fast curing products that are ideal for repairing deep pitting and lost metal.

Chemco manufactures an extensive range of products which are designed to meet every corrosion and containment challenge. We offer unlimited technical support including site survey, estimation, inspection and application assistance. An extensive list of our products and industry uses are listed below:

Products

Glassflake coatings
Coatings in contact with food & beverage
Damp or green concrete primers and coatings
Floor coatings
Rust converters and primers
Under-water coatings
Anti-static and conductive coatings
Elastomeric coatings
Fire retardant & intumescent coatings
Ceramic coatings

Industry

Petro-chemical
Food and beverage (including wine & beer tanks)
Water & sewage (including drinking water)
Nuclear and power generation
Maintenance and new construction
Marine industry (including ballast tank)
Ministry of defence
Car parks, industrial warehouses
Fire and heat protection
Heat insulation
