RU 500 used to repair a badly pitted high-pressure multi-stage impeller. RU 500 is ideally suited for conditions where cavitation and high wear is expected in highly corrosive chemical environments at elevated temperature. The coating also offers an extremely smooth finish saving on pump energy consumption.

Chemco manufactures an extensive range of products which are designed to meet every corrosion and containment challenge. We offer unlimited technical support including site survey, estimation, inspection and application assistance. An extensive list of our products and industry uses are listed below:

Products

- Glassflake coatings
- Coatings in contact with food & beverage
- Damp or green concrete primers and coatings
- Floor coatings
- Rust converters and primers
- Under-water coatings
- Anti-static and conductive coatings
- Elastomeric coatings
- Fire retardant & intumescent coatings
- Ceramic coatings

Industry

- Petro-chemical
- Food and beverage (including wine & beer tanks)
- Water & sewage (including drinking water)
- Nuclear and power generation
- Maintenance and new construction
- Marine industry (including ballast tank)
- Ministry of defence
- Car parks, industrial warehouses
- Fire and heat protection
- Heat insulation
