

Ceramic Tile Coatings

For Marine & Industrial Applications

Our ceramic tile coating system is ideal for application in galley floors found in ships; where traditional tiling is now causing major problems.

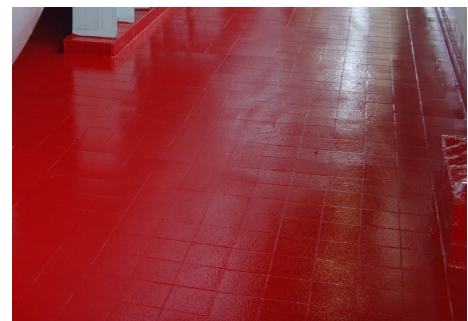

It can be an extremely cost and time consuming process to remove the old tiles.

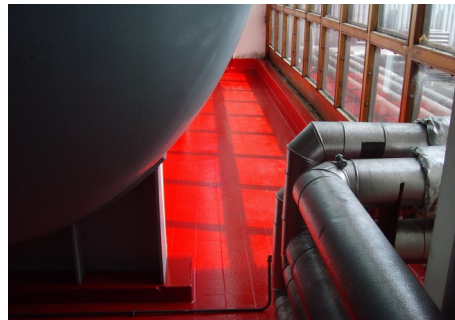

Chemco therefore offer an innovative solution which has exceptional adhesion to ceramic tiles, offering substantial time and cost savings:

- **Epo-chem™ RX 500P (Primer)**
- **Epo-chem™ RA 500M (Topcoat)**

System Benefits:

- **Solvent-free**
- Old tiling systems can be replaced with ease
- Excellent chemical resistance to cleaning fluid and spillages
- No grit blasting requirements
- No humidity or dew point restrictions
- No disruption to working vessel/plant
- Easy to clean
- No odours or contamination of atmosphere
- Fast drying/curing meaning quick back-in-service times
- No recoating limitations for start/stop operations
- No extensive dehumidification or ventilation requirements
- Significantly reduced H&S and Fire Hazard
- Substantial time and cost savings
- Work can be done by crew at sea
- Easily applied by brush/roller
- Certified for food carriage and potable water
