

# Chemco's Key Benefits

## *For Offshore Wind Energy*

Chemco can offer substantial time and cost saving benefits for the offshore wind energy industry.

Our range of innovative coating systems provide efficient, environmentally friendly solutions for a variety of applications within offshore wind farms; most notably for wind turbines, masts and electrical substations.

These key benefits include:

- All preparation and application work can take place whilst the structures remain in situ
- Solvent-free
- No grit blasting required
- Application in all weather conditions
- Application at high temperatures
- Reduced project equipment requirements
- Little or no operational downtime
- Reduced number of coats required
- Good UV resistance
- Aesthetically-pleasing finish and long lasting colour retention
