

Unique Yacht Hull Coating

*For Long Term Hull Protection, Increased Speed
and Improved Fuel Efficiency*

Chem-glide™ RA 500CG is a unique **solvent-free, biocide-free, non-toxic**, non-stick and scrubbable hull coating utilised as an environmentally friendly and cost-effective alternative to conventional anti-fouling paints.

This coating provides a highly chemical and abrasion resistant barrier with high flexibility and exceptional impact resistance.

RA 500CG has been utilised on luxury racing yachts due to its ability to support increased speed and improved fuel efficiency during competitive races.

In one instance, a race-on-race speed increase of **0.4kn** was reported after the Chemco coating had been applied to the yacht's hull.

System Benefits

- **Solvent-free**
- Contains no biocides, harmful chemicals or leaching compounds
- Non-stick, scrubbable coating
- Designed for long-term hull protection
- Glassflake reinforced for exceptional abrasion and chemical resistance
- Smooth finish, high flexibility and exceptional impact resistance
- Supports increased speed and improved fuel efficiency
